Mitch Kajzer is currently employed by Keilman Business Consulting, Inc (KBC) in South Bend, IN as a Computer Forensic Engineer. In this job capacity, he conducts forensic examination on computers, digital media, and other electronic communication devices.

Prior to working at KBC, Kajzer was a law enforcement officer for 20 years and a computer programmer/network engineer for five years. For the last six years of his law enforcement career, Kajzer was Commander of the St. Joseph County High Tech Crimes Unit. In this capacity, Kajzer investigated over 1100 technology cases, the majority of these being Internet crimes against children and frauds. In addition, Kajzer has conducted over 600 forensic computer examinations. These investigations have resulted in over 450 arrests of subjects who have committed sexual crimes against children. In addition, several child victims have been identified and removed from abusive environments due to investigations that Kajzer has been involved in. The High Tech Crimes Unit maintained a conviction rate of 100% with their investigations.

Now employed in the private sector, Kajzer currently holds a number of computer industry technology certifications, including Microsoft Certified Systems Engineer (MCSE), Microsoft Certified Professional with Internet Expertise (MCP+I), A+ Certified Computer Technician, Certified Internet Webmaster – Professional (CIW-P), Certified Forensic Computer Examiner (CFCE), and Certified Computer Examiner (CCE). Kajzer now concentrates on forensic examinations related to private business and civil litigation.
